PROFESSIONAL SUMMARY

Motivated BCA final year student and aspiring Full Stack Developer specializing in Python and AI-driven solutions. Proven experience in developing web applications, including an Employee Management System and an ongoing AI-powered Job Portal. Passionate about leveraging software development fundamentals to solve real-world problems and drive technological innovation.

TECHNICAL SKILLS

Languages: Python (Advanced), HTML5, CSS3, JavaScript

Web Development: Full Stack Development, Responsive Design, REST APIs, SDLC

Tools & Concepts: AI/ML Integration, NLP, Version Control (Git/GitHub), Problem Solving, Debugging, Basic Algorithms

TECHNICAL PROJECTS

AI-Based Job Portal Application (Ongoing)

- Developing an intelligent job search platform featuring a Resume Analyzer to provide automated feedback.
- Integrating an AI Chatbot using Natural Language Processing (NLP) to assist users with job searches.

Employee Management System (EMS)

- Designed a system to streamline organizational data management.
- Implemented features to manage and organize employee records securely.
- Worked across the full Software Development Life Cycle (SDLC).

PROFESSIONAL EXPERIENCE

Web Developer Intern | Aspiron Khuze (Jan 19, 2026 – Feb 25, 2026)

- Developed client-side features using HTML, CSS, and Python frameworks.
- Optimized web application performance and fixed UI/UX issues.
- Gained experience with Git-based version control and agile workflows.

EDUCATION

Bachelor of Computer Applications (BCA) – Final Year

Community Institute of Commerce and Management Studies, Jayanagar, Bangalore

INTERESTS & CERTIFICATIONS

Interests: Full Stack Development (Python), AI & Machine Learning, Tech Innovation.

Personal Projects: Active contributor on GitHub (arfathh17) focusing on Python-based automation tools.
